

REACH Declaration

Foster Corporation has a regulatory department devoted to remaining up to date in the constantly changing regulatory environment and to making sure that our company, the raw materials we utilize and the compounds we sell comply with all state, federal and international laws and reporting requirements. Foster is a downstream user of many substances utilized as raw materials in compounding, and we work closely with all of our suppliers to ensure appropriate registration is completed, if required, for the materials that we purchase. If a Foster compound contains any SVHCs, that information will be disclosed on the compound's Safety Data Sheet (SDS).

It is the responsibility of each manufacturer or downstream user to comply with their own requirements of the REACH regulation.
